

When there is change, it's usual to have questions. Please bring questions you have about progress and achievement to your child's learner hui in the start of Term 3.

This is new. On HERO you will find academic achievement + progress data. We are only reporting on the **new curriculum** so there are not many data points for some subjects. Maths started last year so it has 5 data points. For Writing and Reading, there are only 1 or 2 because students have only been assessed against the new curriculum from this year.

Exceeding - Working above their year-level expectations. They demonstrate advanced thinking and solve complex problems.

Core curriculum areas such as Writing, Reading and Maths are discussed, where appropriate, through comments.
